

**Table 6-1. Total net assignable square feet (NASF) of academic space, total NASF in science and engineering (S&E) fields, and research NASF in S&E fields, in historically Black Colleges and Universities (HBCUs); original and expanded groups of institutions: 1994**  
[NASF in millions]

Index	Original group 1994 <sup>1</sup>	Expanded group 1994 <sup>1</sup>
Number of research-performing HBCUs .....	28 <sup>2</sup>	68 <sup>2</sup>
Total academic space <sup>3</sup> .....	14.7	19.4
Space in S&E fields .....	6.1	7.9
Space used for research in S&E fields .....	1.8	2.2

<sup>1</sup> The original group consists of the 29 HBCUs also surveyed in 1988, 1990, and 1992; the expanded group is the 1994 population of all 70 research-performing HBCUs.

<sup>2</sup> Two of the HBCUs were determined to be out-of-scope since they had no S&E research space; data are weighted to 28 in the original group and 68 in the expanded group.

<sup>3</sup> Projected from responses of 46 percent of original group and 44 percent of expanded group.
